Why Choose Ezzi Vision?

'Partner with excellence in Vacuum Technology, opt for Ezzi Vision'

Decades of Expertise: With 30+ years in the industry, Ezzi Vision is highly experienced in vacuum technology and its applications.

Quality Assurance: We ensure that every Edwards pump meets the highest standards of performance and reliability.

Innovative Solutions: Leading in technological advancements, we provide the latest Edwards pumps, known for their innovation and efficiency.

Customer-Centric: Ezzi Vision delivers personalized service and expert advice to meet your needs.

Nationwide: Ezzi Vision brings quality vacuum solutions to all of Australia.

After-Sales Support: We provide comprehensive support to maintain your equipment's longevity and efficiency.

Sustainable Practices: Our products at Ezzi Vision align with contemporary environmental standards, promoting sustainable practices in your business operations.

With Ezzi Vision propel your business forward using state-of-the-art technology and steadfast support.

Declaration of Conformity

We, Edwards,
Crawley Business Quarter,
Manor Royal
Crawley,
West Sussex, RH10 9LW, UK

declare under our sole responsibility, as manufacturer and person within the EU authorised to assemble the technical file, that the product(s)

Autospec Platform NRA880000

to which this declaration relates is in conformity with the following standard(s) or other normative document(s)

EN1012-2:1996, A1: 2009	Compressors and Vacuum Pumps. Safety Requirements. Vacuum Pumps
EN12100:2010	Safety of machinery. General principles for design. Risk assessment and risk reduction.
EN60034-1: 2004	Rotating electrical machines. Rating and performance
EN13463-1: 2009	Non-electrical equipment for use in potentially explosive atmospheres. Basic method and requirements
EN13463-5: 2003	Non-electrical equipment for use in potentially explosive atmospheres. Protection by constructional safety 'c'

and fulfils all the relevant provisions of

2006/42/EC	Machinery Directive
2006/95/EC	Low Voltage Directive
2004/108/EC	Electromagnetic Compatibility (EMC) Directive
94/9/EC	ATEX Directive on use in Potentially Explosive Atmospheres

Note: This declaration covers all product serial numbers from the date this Declaration was signed onwards.

Peter Meares, GV Technical Support Manager

1 Introduction

1.1 Scope and definitions

For the safe operation of the pump platform please refer to the relevant instruction manuals and safety booklet supplied as part of this document package.

This manual provides Installation, Operation and Maintenance instructions for the pump platform. You must use the pump platform as specified in this manual and associated publications.

Read this manual before you install and operate the pump. Important safety information is highlighted as **WARNING** and **CAUTION** instructions; you must obey these instructions. The use of **WARNINGS** and **CAUTIONS** is defined below.

WARNING

Warnings are given where failure to observe the instruction could result in injury or death to people.

CAUTION

Cautions are given where failure to observe the instruction could result in damage to the equipment, associated equipment and process.

The following IEC warning labels appear on the pump:

Warning - refer to accompanying documentation.

Warning - hot surface.

The units used throughout this manual conform to the SI international system of units of measurement.

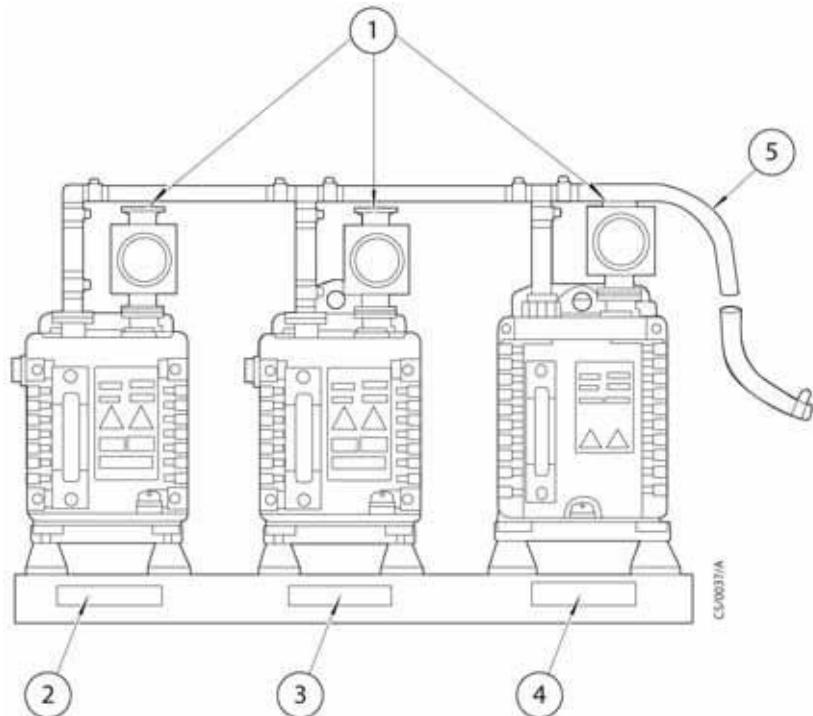

1.2 Description

The pump platform comprises of three rotary vacuum pumps RV3, RVI2 and E2MI8 mounted on a single mobile platform. Three manual speedivalve isolation valves provide process isolation. The exhausts from the vacuum pumps are connected via Tygon® tubing and provides a 5-metre exhaust line.

XDS5	Designated Analyser
XDS10	Designated Source
XDS10	Designated Inlet-1

3 Installation

WARNING

This pump platform is mounted on fixed castors; risk of movement is possible which may result in damage to the inlet and exhaust pipe work, ideally the platform should be chocked in its operating position to prevent accidental movement.

The pump platform should be placed in a position where it does not constitute a trip hazard. The vacuum pumps overhang the footprint of the platform. Care should be taken when moving the platform to avoid damage to the platform and personnel.

WARNING

The pump platform should not be lifted using the individual vacuum pump lifting eyes. The pump platform should be lifted using suitably rated slings positioned beneath the base platform and external to the castors. Care should be taken to ensure the lifting slings do not foul the vacuum pumps.

This page has been intentionally left blank.

4 Operation

Refer to the relevant pump and accessory manuals for operation instructions.

This page has been intentionally left blank.

5 Maintenance

Refer to the relevant pump and accessory manuals for service and maintenance instructions.

6 Storage and Disposal

6.1 Storage

Place protective covers over the inlet and exhaust connections and electrical connections. Store in cool dry conditions until the system is required for use.

6.2 Disposal

Dispose of the pump platform and any components removed from it safely in accordance with all local and national safety and environmental requirements.

7 Spares and Accessories

7.1 Introduction

Edwards products, spares and accessories are available from Edwards companies and a worldwide network of distributors. The majority of these centres employ Service Engineers who have undergone comprehensive Edwards training.

Order spare parts and accessories from your nearest Edwards company or distributor.

When you order, please state for each part required:

- Model and Item Number of your Equipment
- Serial Number (if any)
- Item Number and Description of the part.

This page has been intentionally left blank.

Return the equipment or components for service

Before you send your equipment to us for service or for any other reason, you must send us a completed Declaration of Contamination of Vacuum Equipment and Components - Form HS2. The HS2 form tells us if any substances found in the equipment are hazardous, which is important for the safety of our employees and all other people involved in the service of your equipment. The hazard information also lets us select the correct procedures to service your equipment.

We provide instructions for completing the form in the Declaration of Contamination of Vacuum equipment and Components - Procedure HS1.

If you are returning a vacuum pump, note the following:

- If a pump is configured to suit the application, make a record of the configuration before returning the pump. All replacement pumps will be supplied with default factory settings.
- Do not return a pump with accessories fitted. Remove all accessories and retain them for future use.
- The instruction in the returns procedure to drain all fluids does not apply to the lubricant in pump oil reservoirs.

Download the latest documents from www.edwardsvacuum.com/HSForms/, follow the procedure in HS1, fill in the electronic HS2 form, print it, sign it, and return the signed copy to Edwards.

Note: *If we do not receive a completed HS2 form, we will not accept the return of the equipment.*
