

Instruction Manual

Vibration Isolators

Description	Item Number
Vibration Isolators (Speedivac 2)	A248-01-403
Vibration Isolators (E1M/E2M2, 5, 8, 12 and 18)	A248-01-404
Vibration Isolators (E1M/E2M40 and 80)	A248-01-405
Vibration Isolators (E1M/E2M175 and 275)	A248-01-406
Vibration Isolators (E2M1 and E2M1.5)	A248-01-407
Vibration Isolators (E2M28)	A248-01-412
Vibration Isolators (DP180)	A248-01-414
Vibration Isolators (DP80)	A248-01-416

Why Choose Ezzi Vision?

'Partner with excellence in Vacuum Technology, opt for Ezzi Vision'

Decades of Expertise: With 30+ years in the industry, Ezzi Vision is highly experienced in vacuum technology and its applications.

Quality Assurance: We ensure that every Edwards pump meets the highest standards of performance and reliability.

Innovative Solutions: Leading in technological advancements, we provide the latest Edwards pumps, known for their innovation and efficiency.

Customer-Centric: Ezzi Vision delivers personalized service and expert advice to meet your needs.

Nationwide: Ezzi Vision brings quality vacuum solutions to all of Australia.

After-Sales Support: We provide comprehensive support to maintain your equipment's longevity and efficiency.

Sustainable Practices: Our products at Ezzi Vision align with contemporary environmental standards, promoting sustainable practices in your business operations.

With Ezzi Vision propel your business forward using state-of-the-art technology and steadfast support.

1 Installation

Check that your package contains the following items:

Table 1 - Check list of components

Qty	Description	Check(✓)
4	Vibration isolator	<input type="checkbox"/>
4	Pump fixing screw	<input type="checkbox"/>
4	Plain washer	<input type="checkbox"/>
4	Shakeproof washer	<input type="checkbox"/>

Note: Do not stack pumps on the top of each other if the maximum load per isolator stated in the Technical Data table will be exceeded.

If any of these items is missing, notify your supplier in writing in three days.

For Speedivac 2, E2M1.5, E2M2, E1M5, E2M5, E1M8, E2M8, E2M12, E1M18 and E2M18 pumps, remove the four rubber feet (if fitted), then fit the Vibration Isolators to the four mounting holes in the pump baseplate. On other pump fit the Vibration Isolators to the four mounting holes in the pump support skids.

All Vibration Isolators, with the exception of those for Speedivac 2 pumps, are suitable for free-standing. Alternatively, the Vibration Isolators have fixing holes for bolting to the floor or system frame, if required.

We recommend that you fit flexible tubing or bellows connections between the pump-inlet and pump-outlet and the rest of the system, to prevent the transmission of stress to the vacuum pipelines and/or process equipment.

2 Technical data

Table 2 - Technical data

Pump model	Pump mass (kg)	Maximum load per isolator (kg)	Reduction in height with pump fitted (mm)	Figure number reference	Item Number
Speedivac 2	12.5	5.4	1	1	A248-01-403
E2M1	10.0	2.5	1	2	A248-01-407
E2M1.5	10.0	2.5	1	2	A248-01-407
E2M2	18.2	13.0	-	3	A248-01-404
E1M5	16.8	13.0	-	3	A248-01-404
E2M5	19.6	13.0	-	3	A248-01-404
E1M8	20.0	13.0	-	3	A248-01-404
E2M8	22.8	13.0	-	3	A248-01-404
E2M12	26.0	13.0	-	3	A248-01-404
E1M18	32.0	13.0	-	3	A248-01-404
E2M18	36.0	13.0	1	3	A248-01-404
E2M28	40.0	34.0	1	3	A248-01-412
E1M40	70.5	34.0	1.5	4	A248-01-405
E2M40	72.0	34.0	1.5	4	A248-01-405

E1M275	220.0	100.00	3.5	5	A248-01-406
E2M275	225.0	100.00	3.5	5	A248-01-406
DP80	202.0	70.00	3.0	4	A248-01-416
DP180	230.0	100.00	3.5	5	A248-01-414

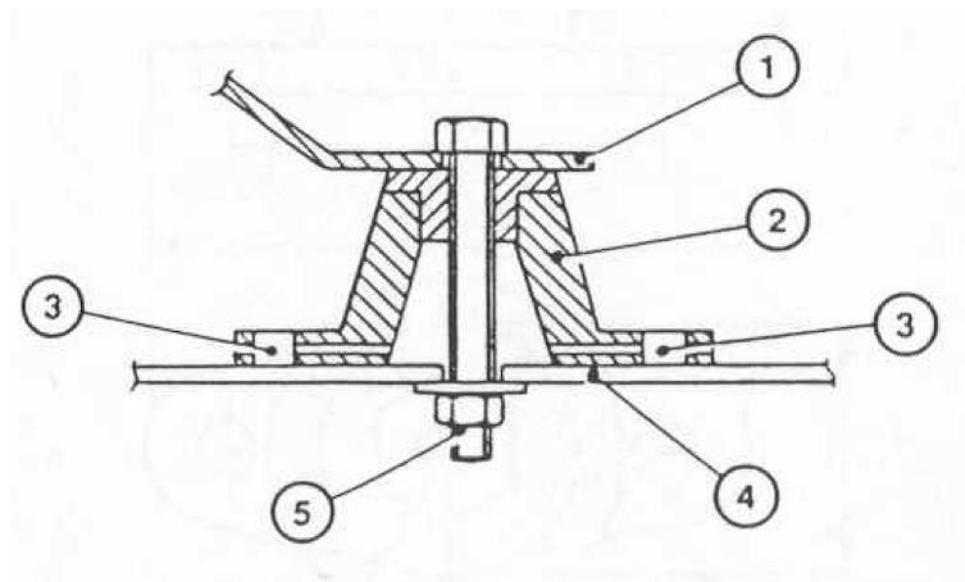

3 Transit

Vibration Isolators for the smaller pumps have rubber-covered bases to prevent sliding, scratching and vibration when the pump is bench mounted.

During transit the isolators can be clamped to the system frame or other suitable surface as shown in [Figure 1](#). Replace the short bolts supplied with longer bolts to pass through the pump base, the Vibration Isolators and the system frame. Fit washers and nuts and tighten the nuts sufficiently to prevent movement of the pump during transit. After transit, remove the nuts and washers, leaving the clamping bolts in position.

The vibration isolators for the larger pumps are fully captive and are suitable for use in transit, provided the pump is kept upright.

Return the equipment or components for service

Before you send your equipment to us for service or for any other reason, you must send us a completed Declaration of Contamination of Vacuum Equipment and Components - Form HS2. The HS2 form tells us if any substances found in the equipment are hazardous, which is important for the safety of our employees and all other people involved in the service of your equipment. The hazard information also lets us select the correct procedures to service your equipment.

We provide instructions for completing the form in the Declaration of Contamination of Vacuum equipment and Components - Procedure HS1.

If you are returning a vacuum pump, note the following:

- If a pump is configured to suit the application, make a record of the configuration before returning the pump. All replacement pumps will be supplied with default factory settings.
- Do not return a pump with accessories fitted. Remove all accessories and retain them for future use.
- The instruction in the returns procedure to drain all fluids does not apply to the lubricant in pump oil reservoirs.

Download the latest documents from www.edwardsvacuum.com/HSForms/, follow the procedure in HS1, fill in the electronic HS2 form, print it, sign it, and return the signed copy to Edwards.

Note: *If we do not receive a completed HS2 form, we will not accept the return of the equipment.*
